

Front Mounted weapon —

Can only fire forward, in some cases only directly forward. Often anti-matter powered.

Side Mounted Weapons —

Available in matched pairs for each side of ship. Examples include laser turrets or rockets, as well as bays for fighters or bombers.

Dorsal Mounted Weapons —

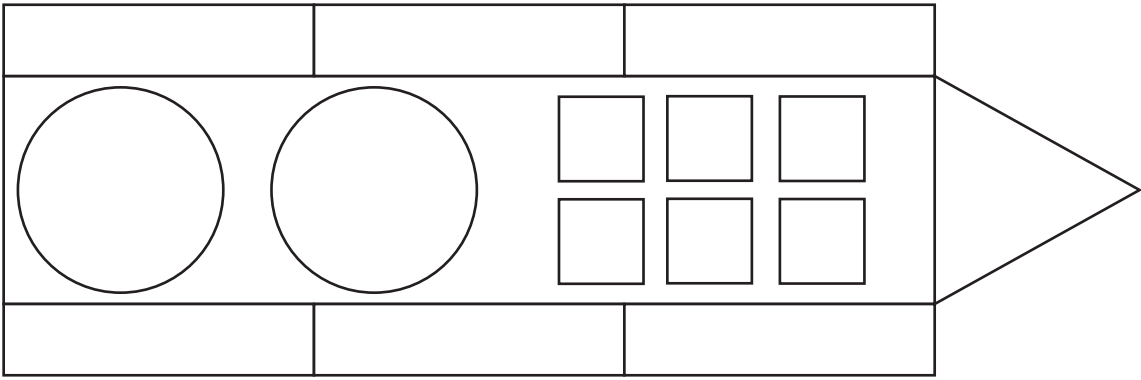

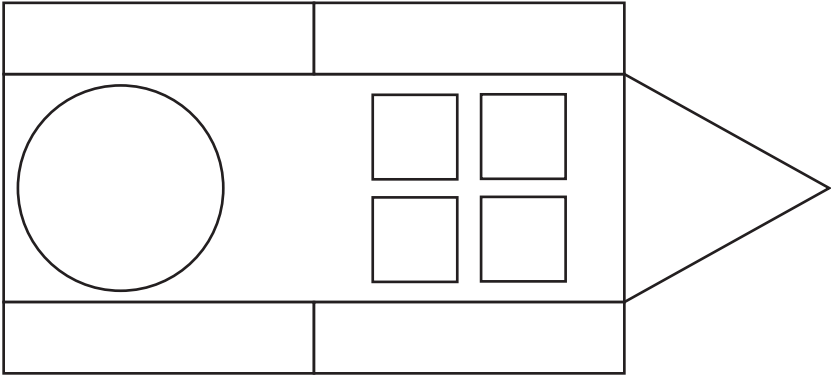

Most flexible weapon mount point as can fire both to the sides and front. However fewer types of weapon can be mounted this way and there ar fewer mount points available in general.

System Upgrades —

Possible examples include extra sheilds or sheild recharge capability, upgraded engines etc.

Hull Examples —
